

**Verizon New England Inc.
d/b/a Verizon New Hampshire**

State of New Hampshire

Docket No. DT 07-011

Respondent: Stephen E. Smith
Title: Vice President – Business
Development

REQUEST: NECTA/Comcast Phone, Rebuttal Testimony Data Request

DATED: September 17, 2007

ITEM: NECTA/CPNH R-3 Please refer to page 9, lines 5-6. Does Mr. Smith agree that the 3-5 day period described has not been finalized and that the duration of the extraction, delivery and uploading time frame will not be known until after the second Verizon data extract has occurred during Stage 4 of the cutover process?

REPLY: The 3-5 day period has not been finalized. The expected duration for the final Cutover data extracts, delivery, and uploading can be better framed after the second test extract, which occurs during stage 3. During stage 4, Verizon will prepare a final delivery matrix which will identify the deliverable, the deliverable media, and the delivery method. The actual window when FairPoint may be without live systems will depend on FairPoint's plan to accept the deliverables and upload them into its operating environment.
